EDUCATION

BS Computer Science

Virtual University of Pakistan

2023 - Present

WORK EXPERIENCE

Front-end Developer

Vvork Cloud Technologies

02/2023 - 04/2023

For the last one year I have been working with JavaScript technology such as React JS and Redux. Expertise in developing web pages using HTML5/CSS3, Bootstrap. Good understanding of Document Object Model (DOM) and DOM functions

Achievements/Tasks

- Convert Figma to React Components and Pages
- Create forms with formik (yup validation)
- For global State Management used Redux
- Api integration using Axios

SKILLS

ReactJs

React Redux

tailwind css

OOP

React Hooks

JavaScript

Html 5

Css 3

Formik

React Router

Axios

git

Figma to HTML

Bootstrap

PERSONAL PROJECTS

Movix

- A web based movie app. That shows latest, trending and upcoming movies. Used 3rd party api TMDB for data. A slick UI design for user experience.

Anime-App

- An anime movie app. This app showcases a carefully curated selection of popular, upcoming, and airing anime titles. For the app's data sourcing, I integrated the jaikan api, a reliable and comprehensive API dedicated to anime-related information.

Pokemon-App

- A pokemon app that shows multiple pokemon characters .once a user a click on a character it will show a detailed statistics and information about that particular character. As users explore the app and encounter different Pokemon characters, the background color dynamically change. I integrated the pokemon api, a reliable and comprehensive API dedicated to pokemon-related information.
